NOBLE GOODS

KERF LOUNGE CHAIR

made to order

wood type, resin color & upholstery customizable

The arms of the Kerf Lounge Chair are made from figured black walnut or quarter-sawn white oak that has been kerf-cut, bent, and inlaid with epoxy resin.

The design came out of an inquiry into materials, with the goal of unifying liquid translucent resin and hard wood in a way that is both structural and aesthetic. Proportioned for relaxation.

Order in colorways shown, or customize.
